

## Stencil Roll Selection Guide

To select the correct stencil roll for the application, please answer the following questions:

1. What type of machine is being used? (Dek, Ekra, MPM, Panasonic, SMTech or Yamaha)
2. What is the length of the current stencil roll core?
3. What is the width of the paper on the current core?
4. What is the core ID (Inner Diameter)?
5. What is the core type? (Paper or Plastic)

### Lets start building a part number!

All of the EasyBraid Stencil Roll part numbers begin the same:

**EB41**

The next letter in the sequence denotes the type of machine:

- D** Dek
- E** Ekra
- M** MPM
- P** Panasonic
- S** SMTech
- Y** Yamaha

Let's say you have a **D**ek Machine

Next you will insert the length of the core you are currently using:

Example: **\*21**" Core

What is the width of the paper on that core?

Example: **\*16**"

Confirm the Core ID and Core Type matches the table below.

You now have your completed EasyBraid part number:

**EB41D2116**

\* Round to the nearest whole number and use the selection table to find the closest match
